

Elsayed R. Talaat received a B.S. degree in Aeronautics and Astronautics Engineering from the University of Washington (1993), and M.S. (1996) and Ph.D. (1999) degrees in Atmospheric and Space Sciences from the University of Michigan under the direction of Dr. Ruth Lieberman and Prof. Paul Hays. His professional career began as a student engineer at the Kirsten Wind Tunnel at the University of Washington from 1991-1993. He continued as a Teaching Assistant (1993) and Research Assistant (1994-1999) at the Space Physics Research Laboratory at the University of Michigan. Dr. Talaat joined the Johns Hopkins University Applied Physics Laboratory (JHU/APL) as a Postdoctoral Fellow in 1999 and became a Senior Professional Staff Research Scientist in 2001. His background consists of work in atmospheric science, space physics, planetary atmospheres, and aerospace engineering. Dr. Talaat has extensive experience in modeling and data analysis of various geophysical phenomena. For the last seven years, Dr. Talaat has been a part of the Thermosphere Ionosphere Mesosphere Energetics Dynamics (TIMED) satellite Project Office and Science Team, where he is working on analyzing and modeling large scale atmospheric and ionospheric dynamics, and photochemical emissions in the Earth's upper atmosphere. Dr. Talaat has also studied different linear and nonlinear phenomena, including shock modeling of cometary explosions and the nonlinear behavior of the multiplex Fabry-Perot interferometer. He is an author/co-author of over 20 papers to refereed journals and over 70 conference papers. In addition, Dr. Talaat has worked for several years with the NASA/APL TIMED Education and Public Outreach (E/PO) Office on various activities such as school and visitor presentations, E/PO product development, and student mentoring. His phone number is 240-228-3971 and his e-mail address is elsayed.talaat@jhuapl.edu.
